Task Sheet No. 5
DAILY LESSON LOG

Lesson Title	Analyzing Service Business Transactions Using the Accounting Equation and Debit and Credit Rules
Learning Area/s	Business 1
Name of Student Teacher/s	Kimberlie Crissel F. Porteria
Name of Cooperating Teacher	Anna Lyn L. Ayeras
Grade Level and Section	Grade 11- ZOBEL
No. of Sessions	5
References *Books, websites, toolkits, etc.*	Grade 11/12 Strengthened Senior High School Lesson Exemplar (Business 1-Basic Accounting 1) ; DepEd FABM 1 Curriculum Guide, Basic Accounting Textbooks.
Declaration of AI use *Cite how AI was used in the formulation of the lesson plan. See DO3. 2. 2026 Annex A*	AI was used for activity planning, research support, and reviewing the clarity, accuracy, and alignment of the lesson. The teacher remains responsible for contextualizing, validating, and delivering the final lesson based on learners' needs, language, and classroom realities.

Intentions

Meaningful learning experiences are anchored in how we frame them. Start by deciding what you want learners to master by the end of the lesson – keep it clear and simple.
Remember: Understanding your learner's evolving context and designing around it ensure that your lessons connect with and are relevant to them.

Learning Competency and Curriculum Standards: *Write the competency/ies from the curriculum that we are targeting, and the content or performance standards applicable to the sessions*	**Learning Competency:** • The Accounting Equation • Analyze simple business transactions following the rules of debit and credit • Distinguish the book of accounts • Discuss Balance Sheet as a Financial Statement **Content Standards:** The learners should have knowledge and understanding of: • The learners demonstrate understanding of the fundamental concepts and principles of accounting and accounting for service business. • The learners demonstrate understanding of concepts and principles of accounting for merchandising business. **Performance Standards:** By the end of the term, the learners are able to: • The learners analyze key accounting functions and principles relevant to real enterprise operations such as type of business, books of accounts used, and accounting process methodology.

Scanned with CamScanner

	Session 1	Session 2	Session 3	Session 4	Session 5
Learning Objectives: *Write the smaller knowledge, skills, or tasks from the competency that the learners will work on and be able to show by the end of the sessions.*	• Explain the accounting equation and identify assets, liabilities, and owner's equity in simple service-business transactions. • Analyze how given transactions affect the accounting equation and show that the equation	• Explain the normal debit and credit effects on assets, liabilities, owner's equity, income, and expenses. • Analyze and record simple service-business transactions using the debit and credit rules and T-accounts.	• Describe the purpose of the general journal, general ledger, subsidiary ledgers, and special journals. • Classify sample transactions and select the appropriate book of accounts for recording them. • Keep accounting work organized and	• Explain the purpose and basic parts of the Balance Sheet and distinguish assets, liabilities, and owner's equity. • Prepare a simple Balance Sheet from a set of account balances and check that the accounting	• Explain how transaction analysis, books of accounts, and the Balance Sheet are connected in the accounting process. • Analyze a short service-business case, record selected transactions, identify the appropriate books, and

	remains balanced. • Demonstrate accuracy when identifying and recording the effects of transactions.	• Show persistence when solving problems and equations.	contribute responsibly during group tasks.	equation is balanced. • Value accurate and honest presentation of financial information.	prepare a simple Balance Sheet using the information provided. • Cooperate fairly in decisions using accounting concepts, and accept feedback constructively.
Learner Context: *Write your observations of your learners, and how they have been performing or responding to learning experiences recently. Include strengths, interests, and possible barriers to learning.*	Learners can connect accounting to everyday experiences such as saving money, paying expenses, and keeping track of purchases. Lessons will use familiar examples, clear modeling, guided practice, and step-by-step reference aids. The teacher will check learners' understanding throughout the sessions and adjust support as needed.				

Scanned with CamScanner

Learning Experience	Learning experience is like a thoughtfully designed journey. Each activity and intersection builds towards meaningful understanding and growth. Identify activities and interactions to help learners gain knowledge, skills, or understanding in a purposeful and coherent way.				
Pre-Lesson: *Describe how you will help the learner get ready for the lesson.*	Show a brief scenario about a small service business, such as a laundry shop or cellphone repair stall. Ask learners what the business owns and what it might owe. Use their answers to introduce assets, liabilities, and owner's equity. State that the lesson will show how business transactions affect the accounting equation.	Ask learners to recall one transaction assets, liabilities, and owner's equity and describe how it affected the accounting equation. Review the account involved before introducing how debit and credit records increase and decrease.	Display a few sample transaction slips, such as cash received for a service, cash paid for supplies, and a transaction that does not fit a special journal. Ask learners how a business might organize these records. Connect their responses to the journals and ledgers introduced in the lesson.	Review assets, liabilities, and owner's equity through a short classification activity. Ask learners what a business owner might want to know about the business's financial position. Introduce the Balance Sheet as a financial statement that presents these account categories.	Use a short review of the accounting equation, debit and credit rules, books of accounts, and the Balance Sheet. Explain the group case task and what learners need to submit before they begin.

Scanned with CamScanner

Lesson Flow: *Describe the activities that you can implement in 1 or more sessions to meet your intentions.* Apply the Learning Design Principles, use the prompts below as a guide. Note, not all principles are expected in every lesson. • *Make the objectives clear for the learners* • *Guide learners before letting them try the task on their own* • *Check the state of the learners' well-being, understanding, and mastery over the lesson* • *Connect today's new concepts to past competencies* • *Encourage collaboration among learners* • *Invite learners to reflect on why this matter to them* • *Ensure inclusion for learners' varied abilities, learning styles, and contexts*	Present Assets = Liabilities + Owner's Equity and explain each part using the business example. Model how the owner's investment, purchase of supplies for cash, and purchase of equipment on credit affect the equation. Work through one transaction with the class. Then, have learners use account cards or a worksheet to analyze two simple transactions individually or with a partner. Check their answers and ask why the equation remains balanced.	Present the debit and credit rules for assets, liabilities, owner's equity, income, and expenses using a simple chart. Model how to record a transaction in T-accounts, explaining why each account is debited or credited. Complete one example together, then have learners practice with a partner using a few service-business transactions. Check selected answers and clarify common errors.	Briefly explain the purpose of the general journal, general ledger, subsidiary ledgers, and special journals. Model how to match one transaction to an appropriate book of accounts. In small groups, learners sort transaction cards by book and explain their choices. Review the answers together, addressing any incorrect matches. End by asking how organized records can help a business.	Show a simple Balance Sheet and explain its purpose and basic parts. Model how to classify sample account balances and place them in the correct sections. Complete one example with the class, then let learners prepare a simple Balance Sheet from a worksheet. Have them check whether Assets = Liabilities + Owner's Equity and correct their work as needed.	Give each group a short service-business case with selected transactions and account balances. Learners identify the accounts affected, record selected transactions using debit and credit rules, choose the appropriate books of accounts, and prepare a simple Balance Sheet using the information provided. Circulate to answer questions and guide groups with prompts. Let groups share one accounting decision, then ask

Scanned with CamScanner

					learners to write one thing they understand better and one part they still need to practice.
Learning Resources: *List down the learning resources that will help you reach your objectives. Ensure that they are available and inclusive.* *Include options and alternatives in case of emergencies.*	Laptop and TV: business scenario and accounting equation Board and markers Account cards and transaction worksheet	Laptop and TV: debit and credit chart and T-account examples Board and markers T-account templates and practice worksheet	Laptop and TV: books of accounts and sample entries Board and markers Transaction cards and sorting worksheet	Laptop and TV: sample Balance Sheet Board and markers Account list and Balance Sheet template Calculator	Laptop and TV: case instructions and checklist Case worksheet and accounting templates Exit slips

Scanned with CamScanner

Opportunities for Integration and Contextualization: *Write down any possibilities to meaningfully connect to another learning area, special topic, local context, or technology. Write N/A if none.*	Entrepreneurship: Use a familiar service business, such as a laundry shop, to show how transactions affect the business. Mathematics: Check that assets equal liabilities plus owner's equity. ICT: Use of laptop and tv to project visuals.	Mathematics: Identify increases and decreases in account balances. English: Explain why each account is debited or credited. ICT: Use of laptop and tv to project visuals.	ICT: Display sample journals and ledgers using the laptop and TV. English: Explain why a transaction belongs in a particular book.	Mathematics: Add account balances and check that the statement is balanced. Entrepreneurship: Discuss how the Balance Sheet helps a business understand its financial position.	Entrepreneurship: Apply the accounting steps to a service-business case. English: Present and explain the group's decisions clearly. ICT: Use of laptop and tv to project visuals.

Assessing Learning

Assessments reveal what learners have gained and what they still need help with. These are helpful in providing you with information to guide your future instruction throughout the entire session.

Formative Assessment: *Create a task, activity or questions to assess learning and provide feedback every now and then. Include ways for learners to ask for guidance or support throughout each session.*	Ask learners to identify what the sample business owns and owes during the pre-lesson. After guided practice,	Begin by asking learners to recall how a transaction affected the equation in Session 1. During partner practice, check	After reviewing the sample transaction slips, have learners sort them into the appropriate books of accounts. Check their group choices	Use the opening account-classification activity to check learners' understanding of assets, liabilities, and owner's equity.	Observe learners as they complete the service -business case. Check their transaction analysis, selected

Scanned with CamScanner

Remember to provide appropriate accommodation so all learners can demonstrate their understanding (e.g. varied response formats, small group options, visual or auditory supports).	have them show how a transaction affects the accounting equation. Check whether they classify accounts correctly and keep the equation balanced; clarify errors using account cards or another example.	their T-accounts and ask them to explain why each account is debited or credited. Provide the reference chart and another guided example when needed.	and ask them to explain one match. Review incorrect choices using the sample journal or ledger.	Then check their completed Balance Sheets for correct placement of accounts and whether Assets = Liabilities + Owner's Equity. Guide learners through correcting any errors.	entries, book choices, and Balance Sheet. Give brief feedback during the task, then ask each learner to write one concept they understand and one they still need to practice.

Ways Forward

Meaningful learning can also happen beyond the classroom – for both the learners and the teacher. Pause and reflect on what happened today.

Extended Learning Opportunities: *Suggest other learning experiences outside the classroom/class hours that learners may want to access to reinforce what they have learned,*	Learners observe a familiar, fictional small-business example and list three possible assets, liabilities, or	Learners create a short example of a service-business transaction and identify the accounts affected.	Learners make a one-page reference chart naming each book of accounts and giving a	Learners review the sample Balance Sheet and write two observations a business owner might make from it.	Learners revise their case output after feedback and write a brief explanation of how

Scanned with CamScanner

to spark their curiosities further, or that may provide them support in their areas of difficulty.	owner's equity items. They do not need to collect private information from an actual business.		sample transaction for it.		the records support business decisions.
Reflections: *Think about what you need to change for the next session based on what happened today. Is there something the learners are interested in exploring?* *Are there some things you would like to share with your co-teachers, parents, or school leaders about your classroom experience? What would you like your instructional coach to help you with?* *Reflections may be written in brief notes, bullets, or annotations.*

Task Sheet No. 5:
DAILY LESSON LOG

INSTRUCTION:

As a pre-service teacher, you are tasked to develop a **Daily Lesson Log (DLL)** based on the prescribed curriculum (ILAW Framework) and identified Most Essential Learning Competencies (MELCs) or Budget of Work (BoW). Using the provided DLL format and the available learning resources, prepare a complete and coherent lesson log (5 sessions) that demonstrates alignment among the learning competencies and standards, learning objectives, content, learning activities/strategies, instructional materials, assessment, and learning opportunities. Your DLL should reflect appropriate teaching strategies, learner-centered activities, and realistic time allotments that respond to the needs and context of the intended learners. Your completed DLL will serve as a professional teaching document that may be used by your cooperating teacher to review the appropriateness and effectiveness of your planned lesson.

RUBRIC FOR GRADING:

CRITERIA	EXCELLENT	PROFICIENT	DEVELOPING	BEGINNING
Intensions (20%)	Intentions are clearly and appropriately stated, with relevant learning competencies accurately articulated. Strong coherence and alignment are evident across all sections of the DLL.	Intentions are clearly stated, with appropriate learning competencies articulated. Coherence and alignment are evident across most sections of the DLL, with only minor inconsistencies. ✓	Intentions are partially stated, and the learning competencies are somewhat appropriate but may require clarification. There are inconsistencies across several sections.	Intentions are unclear, incomplete, or inappropriate, and the learning competencies are not articulated. Little or no alignment is evident across the sections of the DLL.
Learning Experience Design (20%)	The learning experience is clear, detailed, and logically sequenced. Another teacher can implement the lesson independently without additional explanation. Learning design principles are intentionally and consistently embedded throughout the lesson.	The learning experience is clear and logically organized. Another teacher can implement the lesson with minimal clarification. Learning design principles are appropriately embedded in most parts of the lesson. ✓	The learning experience is partially clear or inconsistently organized. Another teacher may require additional explanation to implement some parts. Learning design principles are partially evident.	The learning experience is unclear, incomplete, or poorly organized. Another teacher would require substantial explanation to implement the lesson. Learning design principles are not evident or appropriately embedded.
Learning Experience for Opportunities and Inclusivity (20%)	The learning experience maximizes available opportunities for integration and contextualization. Activities are highly relevant to learners' experiences and are inclusive and responsive to learners with disabilities, barriers, and diverse or unique contexts.	The learning experience provides appropriate opportunities for integration and contextualization. Activities consider learners' needs and are generally inclusive and supportive of learners with disabilities, barriers, and diverse contexts. ✓	The learning experience demonstrates limited integration and contextualization. Some learner differences and barriers are considered, but support and inclusive strategies are inconsistent or incomplete.	The learning experience shows little or no integration or contextualization. Learners with disabilities, barriers, and unique contexts are not adequately considered.

Scanned with CamScanner

Assessment Strategies (20%)	Assessment strategies are intentionally integrated throughout the session and effectively monitor learners' progression. They generate clear and sufficient evidence of whether learning outcomes have been achieved and inform subsequent teaching decisions.	Assessment strategies are integrated at appropriate points in the session and provide evidence of learners' progress and achievement. The results generally support instructional decisions.	Assessment strategies are present but inconsistently integrated. They provide limited evidence of learners' progression or achievement and only partially inform instructional decisions.	Assessment strategies are limited, inappropriate, or disconnected from the learning experience. They provide little or no evidence of learners' progress or achievement.
Ways Forward and Interventions (20%)	Ways forward and interventions are specific, practical, and actionable, clearly indicating how learning will be extended, enriched, or adjusted based on learner performance and reflection.	Ways forward and interventions are appropriate and actionable, providing reasonable adjustments or extensions based on learner performance and reflection.	Ways forward and interventions are general or partially actionable. Connections to learner performance and reflection are limited.	Ways forward and interventions are unclear, impractical, or absent, with little evidence that learner performance or reflection informs subsequent learning.

Form No. 1
WEEKLY MENTORING FORM

Name of Pre-service Teacher	Kimberlie Crissel F. Porteria
Program/Section	Bachelor of Technical-Vocational Teacher Education Major in Computer Programming
Name of Cooperating School	Pres. Diosdado Macapagal High School
Name of Cooperating Teacher	Anna Lyn L. Ayeras
Date Accomplished	10/19/26
Mentoring Session No.	3

A. OUTPUT/ACTIVITY EVALUATION AND COMMENTS

INSTRUCTION: Kindly provide comments or suggestions and indicate the total score on the activity accomplished by your assigned pre-service teacher for the week. The pre-service teacher shall review the feedback and use it as a basis for reflection and continuous improvement.

Strength/s

DLL has complete parts, Lesson obj. were achieved as widenced by class participation and formative assessment, student engagement - learners were highly engaged during the activities and showed active collaboration.

Weakness/es

* Instructional Strategy - integration of visuals will be better if genuine samples are used on real - life.

Suggestion/s

* You may write or complete the Reflection Part of the DLL.
* Ways Forward Act. - you may also add research or interview a business owner (SME).

Criteria-based Score

B. PRE-SERVICE TEACHER'S EVALUATION AND COMMENTS

INSTRUCTION: Evaluate the pre-service teacher's demonstrated skills in each area based on actual performance during the Field Study experience. Place a check mark (✓) under the rating that best describes the level of skill demonstrated.

Scanned with CamScanner

5 – Extremely Skilled - Demonstrates the skill consistently, independently, accurately, and effectively. Performs beyond the expected level with confidence and initiative.
4 – Moderately Skilled - Demonstrates the skill effectively and consistently with minimal guidance. Meets the expected level of performance.
3 – Developing - Demonstrates the basic skill adequately but may require occasional guidance, practice, or improvement.
2 – Needs Improvement -Demonstrates limited skill and requires frequent guidance, supervision, and practice to perform the task appropriately.
1 – Not Skilled at all - Demonstrates minimal or no evidence of the skill and requires substantial guidance and support.

MAINTAINING EFFECTIVE COMMUNICATION	5	4	3	2	1

C. PRE-SERVICE TEACHER'S EVALUATION AND COMMENTS

INSTRUCTION: Kindly provide comments or suggestions on the performance of the pre-service teacher as a basis for reflection and continuous improvement.

Strength/s

- Pre-service Teacher demonstrates knowledge and understanding of the concept of the lesson.
- meets professional ethics and responsibilities
- Uses curriculum, assessment and reporting knowledge to design effective learning sequences and lesson plans.

Weakness/es

- Pre-service teacher is somehow nervous & and very soft-spoken. &

Suggestions

- Provide notes/journal. &
