Task Sheet No. 6
DAILY LESSON PLAN

Lesson Title	The Accounting Equation
Learning Area/s	Business 1
Name of Student Teacher/s	Kimberlie Crissel F. Porteria
Name of Cooperating Teacher	Anna Lyn L. Ayeras
Grade Level and Section	Grade 11- ZOBEL
No. of Sessions	1
References *Books, websites, toolkits, etc.*	Grade 11 Strengthened Senior High School Lesson Exemplar (Business 1-Basic Accounting 1) ; DepEd FABM 1 Curriculum Guide, Basic Accounting Textbooks.
Declaration of AI use *Cite how AI was used in the formulation of the lesson plan. See DO3. 2. 2026 Annex A*	AI was used for activity planning, topic support, and reviewing the clarity, accuracy, and alignment of the lesson. The teacher remains responsible for contextualizing, validating, and delivering the final lesson based on learners' needs, language, and classroom realities.

Intentions

Meaningful learning experiences are anchored in how we frame them. Start by deciding what you want learners to master by the end of the lesson – keep it clear and simple.
Remember: Understanding your learner's evolving context and designing around it ensure that your lessons connect with and are relevant to them.

Learning Competency and Curriculum Standards: *Write the competency/ies from the curriculum that we are targeting, and the content or performance standards applicable to the sessions*	**Learning Competency:** • Analyze simple business transactions following the rules of debit and credit **Content Standards:** The learners should have knowledge and understanding of: • The learners demonstrate understanding of the fundamental concepts and principles of accounting and accounting for service business.

Scanned with CamScanner

	Performance Standards: By the end of the term, the learners are able to: • The learners analyze key accounting functions and principles relevant to real enterprise operations such as type of business, books of accounts used, and accounting process methodology.
Learning Objectives: *Write the smaller knowledge, skills, or tasks from the competency that the learners will work on and be able to show by the end of the sessions.*	• Explain the accounting equation and identify assets, liabilities, and owner's equity in simple service-business transactions. • Analyze simple transactions and show their effects on the accounting equation. • Work cooperatively, check calculations carefully, and listen respectfully to a partner's explanation.
Learner Context: *Write your observations of your learners, and how they have been performing or responding to learning experiences recently. Include strengths, interests, and possible barriers to learning.*	Learners can connect accounting to familiar experiences such as saving money, paying expenses, and keeping track of purchases. Clear examples, visual supports, and step-by-step practice will help learners who are still building familiarity with accounting terms and transaction effects.

Learning Experience

Learning experience is like a thoughtfully designed journey. Each activity and intersection builds towards meaningful understanding and growth. Identify activities and interactions to help learners gain knowledge, skills, or understanding in a purposeful and coherent way.

	TEACHER'S ACTIVITY	STUDENT'S ACTIVITY
Pre-Lesson: *Describe how you will help the learner get ready for the lesson.*	Show the title slide and welcome the students	Greet the teacher and observe classroom cleanliness
	Check their attendance, and state the objectives.	Listen to the objectives, and ask questions if needed.
	"Before we begin, imagine that you are opening a small computer repair shop."	

Scanned with CamScanner

	"Let's identify what your business owns, owes, and receives from you as its owner." "Show one finger for **assets**, two for **liabilities**, and three for **owner's equity**. Everyone, get ready!"	Prepare to answer using hand signals.
	Present each item separately: 1. cash in the business 2. repair tools 3. an unpaid amount owed to a supplier 4. a bank loan payable 5. the owner's capital.	Respond: **1, 1, 2, 2, 3.**
	After each item, ask a student "Why did you choose that category?" Give brief feedback and clarify incorrect answers.	Explain answers using what they remember about the account categories.
	"Your repair shop has ₱15,000 cash. You contributed ₱10,000, and the business borrowed ₱5,000 from a bank." "How much does the business own? How much does it owe? How much represents your equity?"	Answer: Assets: ₱15,000 Liabilities: ₱5,000 Owner's Equity: ₱10,000
	"What do you notice when we add the amount borrowed and the owner's contribution?"	"They equal the business's cash of ₱15,000."
	"Exactly! These three categories are connected. Today, we will express that relationship through the **accounting equation.**"	

Scanned with CamScanner

		Prepare to explore **Assets = Liabilities + Owner's Equity.**
Lesson Flow: *Describe the activities that you can implement in 1 or more session to meet your intentions.* Apply the Learning Design Principles, use the prompts below as a guide. Note, not all principles are expected in every lesson. • *Make the objectives clear for the learners* • *Guide learners before letting them try the task on their own* • *Check the state of the learners' well-being, understanding, and mastery over the lesson* • *Connect today's new concepts to past competencies* • *Encourage collaboration among learners* • *Invite learners to reflect on why this matter to them* • *Ensure inclusion for learners' varied abilities, learning styles, and contexts*	Display the equation: **Assets = Liabilities + Owner's Equity** Explain that assets are resources owned by the business, liabilities are amounts it owes, and owner's equity is the owner's claim in the business. Explain that the equation must remain balanced after each transaction. Use a visual organizer with the three categories and real-life examples such as: 1. Cash in the business 2. Computer used by the business 3. Amount owed to a supplier 4. Bank loan 5. Money invested by the owner Ask learners to decide where each example belongs: assets, liabilities, or owner's equity. Review the answers and clarify any confusing examples. "If there is an amount owed to a supplier, which category is that?" "Correct. It is an amount the business still needs to pay."	Follow the explanation and take down notes about the three parts of the equation. Sort examples under assets, liabilities, or owner's equity. "A liability."

Scanned with CamScanner

ITEM	CATEGORY
Cash in the business	Asset
Computer used by the business	Asset
Amount owed to a supplier	Liability
Bank loan	Liability
Money invested by the owner	Owner's Equity

"Now that we know how the equation is arranged, let's try using it to find a number that is missing."

Show the **"What's Missing?"** slide.

1. Assets = ₱50,000; Liabilities = ₱18,000; Owner's Equity = ?
   Answer: ₱32,000

2. Assets = ₱72,000; Liabilities = ?; Owner's Equity = ₱45,000
   Answer: ₱27,000

Give learners time to solve both items independently.

Ask volunteers to explain how they found the missing amount, then show the answers.

"You have found missing amounts when the equation was already given. Next, we'll see how business transactions change the amounts in the equation."

Show the Gray Electronic Repair Services example to model the first two transactions.

Find and calculate the missing owner's equity or liability using the equation.

Explain or check how the equation helped them find the missing amount.

"The business's assets and owner's equity increase."

Scanned with CamScanner

	"When the owner invests money in the business, what increases?"	
		"Assets increase, and liabilities increase because the business still owes the supplier."
	"Good. What happens when supplies are purchased on credit?"	
	"Excellent! Now, we've worked through the first two transactions together. You and your partner will apply the same steps to the remaining transactions."	
	Group the students into pairs to work through the remaining transactions:	Work with a partner to analyze the remaining transactions.
	paying for fixtures, buying supplies on credit, and earning cash from repair services.	Complete the table and check whether each updated equation balances.
	Explain that an expense reduces the owner's equity and service revenue increases it. Guide pairs as they work.	
	Review the completed Gray example.	
	Show how the final totals satisfy the equation: **₱13,030 = ₱1,500 + ₱11,530.**	
	Address errors and explain why the equation balances.	
	"You have practiced with a partner. Now let's check what each of you can solve independently."	

Scanned with CamScanner

	Host a six-question Kahoot as the exit assessment. Show the game PIN or QR code. Allow enough time for learners to read each question, then briefly explain answers that many learners missed.	Join individually if devices are available. If devices are limited, answer with a partner and use paper to answer the same questions.
Learning Resources: *List down the learning resources that will help you reach your objectives. Ensure that they are available and inclusive.* *Include options and alternatives in case of emergencies.*	• Laptop and TV Learner devices, if available • Paper copies of the questions as a backup • Whiteboard • Marker	• Pen and paper • Smartphone
Opportunities for Integration and Contextualization: *Write down any possibilities to meaningfully connect to another learning area, special topic, local context, or technology. Write N/A if none.*	Entrepreneurship: Use the Gray Electronic Repair Services example to connect accounting to a small service business. Mathematics: Use addition and subtraction to calculate account balances and find missing amounts. English: Ask learners to explain why a transaction affects particular accounts. ICT: Use the laptop and TV to display the slides, worked examples and assessment.	

Assessing Learning

Assessments reveal what learners have gained and what they still need help with. These are helpful in providing you with information to guide your future instruction throughout the entire session.

TEACHER'S ACTIVITY	STUDENT'S ACTIVITY

Scanned with CamScanner

Formative Assessment: *Create a task, activity or questions to assess learning and provide feedback every now and then. Include ways for learners to ask for guidance or support throughout each session.*	During the review and classification activity, check whether learners distinguish assets, liabilities, and owner's equity.	Classify accounts, explain answers, and correct misconceptions.
Remember to provide appropriate accommodation so all learners can demonstrate their understanding (e.g. varied response formats, small group options, visual or auditory supports).	Explain incorrect classifications using familiar examples.	
	During "What's Missing?", check the operation and calculation used. Provide a prompt when learners confuse liabilities and equity.	Show calculations and revise incorrect solutions.
	During pair work, check account identification, transaction effects, and updated balances.	Explain decisions, check calculations, share tasks, and respond respectfully.
	Observe task sharing, careful checking, and respectful listening.	
	Encourage learners to raise a hand or approach the teacher when they need guidance. Provide account labels, equation guides, or step-by-step prompts as needed.	Ask for help and use the available support.

Ways Forward

Meaningful learning can also happen beyond the classroom – for both the learners and the teacher. Pause and reflect on what happened today.

	TEACHER'S ACTIVITY	STUDENT'S ACTIVITY
Extended Learning Opportunities: *Suggest other learning experiences outside the classroom/class hours that learners may want to access to*	"What does the accounting equation help us check?"	"It helps us check that the business's assets equal its liabilities plus owner's equity."

Scanned with CamScanner

reinforce what they have learned, to spark their curiosities further, or that may provide them support in their areas of difficulty.	"To practice at home, choose a familiar or made-up small business, such as a sari-sari store or snack stall." "Write two simple transactions and show how each affects the accounting equation. You may use imaginary amounts" "Bring your work next class so you can share it with a partner." "Thank you for participating today."	Listen to the directions and ask questions if needed. "Thank you, Ma'am!"
Reflections: *Think about what you need to change for the next session based on what happened today. Is there something the learners are interested in exploring?* *Are there some things you would like to share with your co-teachers, parents, or school leaders about your classroom experience? What would you like your instructional coach to help you with?* *Reflections may be written in brief notes, bullets, or annotations.*

Task Sheet No. 6:
DAILY LESSON PLAN WITH INSTRUCTIONAL MATERIAL INTEGRATION AND ICT APPS

INSTRUCTION:

As a pre-service teacher, you are tasked to develop a **detailed lesson plan** based on the identified learning competencies, standards, objectives, and content area. Using the prescribed lesson plan format (follow the ILAW Framework), design a learning experience that demonstrates clear alignment among the learning intentions, learning activities, instructional materials, ICT integration, assessment strategies, and intended learning outcomes. The lesson should maximize opportunities for integration and contextualization and should be inclusive and responsive to learners with diverse abilities, learning needs, cultures, barriers, and unique contexts.

Your completed lesson plan will serve as a professional teaching document that another teacher can implement with minimal or no additional explanation. Ensure that the learning experiences are logically sequenced, the instructional materials and ICT resources are appropriate and effectively utilized, and assessment strategies provide evidence of learners' progress and achievement. Include appropriate ways forward and interventions based on learners' performance and reflection. Submit the completed lesson plan within the prescribed period for evaluation and feedback.

RUBRIC FOR GRADING:

CRITERIA	EXCELLENT	PROFICIENT	DEVELOPING	BEGINNING
Intensions (10%)	Intentions are clearly and appropriately stated, with relevant learning competencies accurately articulated. Strong coherence and alignment are evident across all sections of the DLL.	Intentions are clearly stated, with appropriate learning competencies articulated. Coherence and alignment are evident across most sections of the DLL, with only minor inconsistencies.	Intentions are partially stated, and the learning competencies are somewhat appropriate but may require clarification. There are inconsistencies across several sections.	Intentions are unclear, incomplete, or inappropriate, and the learning competencies are not articulated. Little or no alignment is evident across the sections of the DLL.
Instructional Materials (20%)	ICT and other learning resources/materials are carefully selected, well-prepared, and effectively utilized. They are highly appropriate to the learners, strongly aligned with the learning intentions (competencies, standards, and objectives), and directly support the content and intended learning outcomes.	ICT and other learning resources/materials are appropriately selected, prepared, and utilized. They are aligned with the learning intentions and content area and generally support learners in achieving the intended outcomes.	ICT and other learning resources/materials are partially appropriate or inconsistently utilized. Alignment with the learning intentions and content area is evident but has some gaps, limiting their effectiveness in supporting learning.	ICT and other learning resources/materials are inappropriate, insufficiently prepared, or minimally utilized. They show little or no alignment with the learning intentions and content area and provide limited support for learning
Learning Experience Design (10%)	The learning experience is clear, detailed, and logically sequenced. Another teacher can implement	The learning experience is clear and logically organized. Another teacher can implement the lesson	The learning experience is partially clear or inconsistently organized. Another teacher may require	The learning experience is unclear, incomplete, or poorly organized. Another teacher would require

Scanned with CamScanner

	the lesson independently without additional explanation. Learning design principles are intentionally and consistently embedded throughout the lesson.	with minimal clarification. Learning design principles are appropriately embedded in most parts of the lesson. ✓	additional explanation to implement some parts. Learning design principles are partially evident.	substantial explanation to implement the lesson. Learning design principles are not evident or appropriately embedded.
Learning Experience for Opportunities and Inclusivity (20%)	The learning experience maximizes available opportunities for integration and contextualization. Instructional materials and activities are highly relevant to different learners' styles and are inclusive and responsive to learners with disabilities, barriers, and diverse culture or unique contexts.	The learning experience provides appropriate opportunities for integration and contextualization. Instructional materials and activities are relevant to different learners' styles and are inclusive and responsive to most learners with disabilities, barriers, and diverse culture or unique contexts. ✓	The learning experience provides some opportunities for integration and contextualization. Instructional materials and activities are somewhat relevant to different learners' styles and are partially inclusive and responsive to learners with disabilities, barriers, and diverse culture or unique contexts.	The learning experience provides limited opportunities for integration and contextualization. Instructional materials and activities are not sufficiently relevant to different learners styles and are limited in being inclusive and responsive to learners with disabilities, barriers, and diverse culture or unique contexts.
Assessment Strategies (20%)	Assessment strategies are intentionally integrated throughout the session and effectively monitor learners' progression. They generate clear and sufficient evidence of whether learning outcomes have been achieved and inform subsequent teaching decisions.	Assessment strategies are integrated at appropriate points in the session and provide evidence of learners' progress and achievement. The results generally support instructional decisions. ✓	Assessment strategies are present but inconsistently integrated. They provide limited evidence of learners' progression or achievement and only partially inform instructional decisions.	Assessment strategies are limited, inappropriate, or disconnected from the learning experience. They provide little or no evidence of learners' progress or achievement.
Ways Forward and Interventions (20%)	Ways forward and interventions are specific, practical, and actionable, clearly indicating how learning will be extended, enriched, or adjusted based on learner performance and reflection.	Ways forward and interventions are appropriate and actionable, providing reasonable adjustments or extensions based on learner performance and reflection. ✓	Ways forward and interventions are general or partially actionable. Connections to learner performance and reflection are limited.	Ways forward and interventions are unclear, impractical, or absent, with little evidence that learner performance or reflection informs subsequent learning.

Form No. 1
WEEKLY MENTORING FORM

Name of Pre-service Teacher	Kimberlie Crissel F. Porteria
Program/Section	Bachelor of Technical-Vocational Teacher Education Major in Computer Programming
Name of Cooperating School	Pres. Diosdado Macapagal High School
Name of Cooperating Teacher	Anna Lyn L. Ayeras
Date Accomplished	10/19/26
Mentoring Session No.	3

A. OUTPUT/ACTIVITY EVALUATION AND COMMENTS

INSTRUCTION: Kindly provide comments or suggestions and indicate the total score on the activity accomplished by your assigned pre-service teacher for the week. The pre-service teacher shall review the feedback and use it as a basis for reflection and continuous improvement.

Strength/s

DLL has complete parts, Lesson obj. were achieved as evidenced by class participation and formative assessment; student engagement - learners were highly engaged during the activities and showed active collaboration.

Weakness/es

- Instructional Strategy - integration of visuals will be better if some samples are based on real - life.

Suggestion/s

- You may write or complete the Reflection Part of the DLL.
- Ways Forward Act. - you may also add research or interview a business owner (SME).

Criteria-based Score

B. PRE-SERVICE TEACHER'S EVALUATION AND COMMENTS

INSTRUCTION: Evaluate the pre-service teacher's demonstrated skills in each area based on actual performance during the Field Study experience. Place a check mark (✓) under the rating that best describes the level of skill demonstrated.

Scanned with CamScanner

5 – Extremely Skilled - Demonstrates the skill consistently, independently, accurately, and effectively. Performs beyond the expected level with confidence and initiative.
4 – Moderately Skilled - Demonstrates the skill effectively and consistently with minimal guidance. Meets the expected level of performance.
3 – Developing - Demonstrates the basic skill adequately but may require occasional guidance, practice, or improvement.
2 – Needs Improvement -Demonstrates limited skill and requires frequent guidance, supervision, and practice to perform the task appropriately.
1 – Not Skilled at all - Demonstrates minimal or no evidence of the skill and requires substantial guidance and support.

MAINTAINING EFFECTIVE COMMUNICATION	5	4	3	2	1

TOTAL SCORE	/ 20				

Scanned with CamScanner

C. PRE-SERVICE TEACHER'S EVALUATION AND COMMENTS

INSTRUCTION: Kindly provide comments or suggestions on the performance of the pre-service teacher as a basis for reflection and continuous improvement.

Strength/s

- Preservice Teacher demonstrates knowledge and understanding of the concept of the lesson.
- meets professional ethics and responsibilities
- uses curriculum, assessment and reporting knowledge to design effective learning sequences and lesson plans.

Weakness/es

- Pre-service teacher is somehow nervous ✓ and very soft-spoken. ✓

Suggestions

- Provide notes/journal. ✓
