# Task Sheet No. 9:
# REFLECTION AND CERTIFICATE OF PARTICIPATION IN NATIONAL SEMINARS OR CONFERENCES

## INSTRUCTION:

As a pre-service teacher, you are tasked to participate in a national seminar, conference, webinar, or professional development activity relevant to education and your field of specialization. After the activity, prepare a written reflection discussing the key knowledge, skills, insights, and professional learnings you gained and how these can be applied to your future teaching practice. Attach a copy of your Certificate of Participation/Attendance as evidence of your participation. Your output should demonstrate how the experience contributed to your professional growth and understanding of current trends, issues, and practices in education.

## RUBRIC FOR GRADING:

| CRITERIA | EXCELLENT | PROFICIENT | DEVELOPING | BEGINNING |
|---|---|---|---|---|
| **Knowledge and Insights Gained (25%)** | Clearly and comprehensively explains the important knowledge, insights, and skills gained from the seminar/conference, with specific examples. | Clearly explains relevant knowledge, insights, and skills gained, with some supporting details. | Identifies some learning gained but provides limited explanation or supporting details. | Provides minimal or unclear discussion of what was learned. |
| **Application to Future Career (25%)** | Provides a clear, specific, and thoughtful explanation of how the learning will contribute to future teaching practice and professional growth. | Explains how the learning can contribute to future teaching practice, with reasonable examples. | Provides a general explanation of possible application with limited examples. | Provides little or no explanation of how the learning can be applied to a future career. |
| **Depth of Reflection (25%)** | Demonstrates deep personal reflection, critical thinking, and meaningful connections between the seminar and future professional practice. | Demonstrates thoughtful reflection and makes relevant connections to professional practice. | Demonstrates some reflection but connections are mostly general or descriptive. | Shows little evidence of reflection or critical thinking. |
| **Completeness, Accuracy, and Presentation (25%)** | Response is complete, accurate, well-organized, coherent, and professionally presented, addressing all required questions thoroughly. | Response is mostly complete, accurate, and well-organized, with minor omissions or presentation issues. | Response is partially complete or contains some inaccuracies, unclear ideas, or organizational issues. | Response is incomplete, inaccurate, poorly organized, or difficult to understand. |

**Activity: Write a short refection about a national seminars or conferences attended or participated. Indicate what you had learned and what do they contribute to your future career as teacher (limit your answer to one page only).**

## REFLECTION ESSAY

1. What knowledge, insights, and skills did you gain from the seminar or conference you attended? Discuss the key concepts, ideas, or practices that you found meaningful and relevant to your professional development.

One of the most important insights I gained was the importance of transforming classroom speaking into real and meaningful communication. I realized that speaking activities should not only focus on whether learners can provide the correct answer. They should also encourage students to explain their thoughts, respond to others, ask questions, and communicate for a genuine purpose. This is especially meaningful to me because, during classroom observations, I have noticed that some learners can write information in their notes but still find it difficult to explain concepts using their own words. The webinar made me understand that knowing information and being able to communicate one's understanding are different skills that both need to be developed.

The second webinar also broadened my perspective by connecting artificial intelligence and emotional intelligence with learners' speaking development. I learned to view technology such as AI not as a replacement for the teacher, but as a possible support for creating learning opportunities and helping learners practice. At the same time, the emphasis on emotional intelligence reminded me that technology alone cannot create an effective learning environment. Teachers must consider learners' confidence, emotions, individual differences, and willingness to participate. Students may know an answer but hesitate to speak because they are afraid of making mistakes or being judged. This strengthened my understanding that creating a supportive classroom environment is just as important as providing good instructional materials.

2. How do you think your learnings from the seminar or conference will contribute to your future career as a teacher? Explain how you can apply the knowledge, skills, and insights gained to your future teaching practice and professional growth.

These learnings will contribute to my future career by influencing how I create and facilitate classroom activities. I would like to provide activities where learners do more than memorize information. I can incorporate pair and group discussions, presentations, reflection questions, and other tasks that require learners to explain and apply what they know. I also want to ask more open-ended questions instead of relying only on questions with one correct answer. In doing so, I can encourage learners to think critically while developing their confidence in expressing their ideas.

I can also responsibly integrate AI into my future teaching by using it as a supporting tool while maintaining my responsibility to evaluate, contextualize, and adapt learning materials according to my students' needs. More importantly, I will remember the role of emotional intelligence when interacting with learners. I want to respond constructively to mistakes, encourage hesitant students, listen to different perspectives, and establish a classroom where students feel safe enough to participate.

Overall, these webinars helped me see that effective teaching is not simply about delivering content. It is also about creating opportunities for learners to communicate, building their confidence, and using available tools purposefully and responsibly. As I continue developing as a teacher, I hope to apply these insights to create a classroom where learners are not only knowledgeable but are also confident enough to express, discuss, and apply what they have learned.

Certificate of attendance or participation
